	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● “sync” downloads the Google Sheet as a TSV ● “find” can search by name, school, years, etc. ● “export” converts the TSV to a JSON	**Schedule - (For V2.0+)** ● “export” as a CSV or other forms of data ● --public or --private tag to hide contact info ● creating a website to host the info for everyone
Not Important	**Delegate - (Use a library)** ● Google Forms/Sheets collects responses from friends (but will use fake data in the project for privacy reasons) ● sort and awk for filtering ● jq for JSON conversion	**Delete - (Cut it)** ● scraping Instagram to find other old friends (against Instagram TOS) ● a gui or other visual interface (stick to the command line for now) ● a full SQL database
